

ARMY MEDICAL MUSEUM  
CATALOGUE

Section 6

Indian Curiosities, etc.

A. 1. An Indian bow, three and a half feet in length, made of hickory.

Contributor and history: unknown.

A. 2. An Indian War bow of the Yankton or the Sisseton - Upper Sioux. It is made of hickory; is three and a half feet in length, and possesses a double curve. It is stained red and is wrapped with red worsted near the middle, and each end is ornamented with blue ribbon. It is bound near one extremity, where it has been split, with some tendonous material.

Made by an Indian Prisoner at Ft. Ridgely.  
Contributed by Asst. Surgeon Alf. Müller.

A. 3. A Kiowa bow, bow-case and quiver. The bow is fifty inches in length, made of Bois d'arc. The case and quiver are of Buffalo hide. These were picked up during the pursuit of the Indians, June 12<sup>th</sup> 1867, who stampeded the cavalry herd at Fort Dodge, Kansas.

Contributed by Asst. Surgeon C. S. DeGraw, U.S.A.

- A. 4. A Navajo bow from Fort Sumner, N.M. It is of hickory three and a half feet in length, bound at the middle and extremities with deer fibres. The cord is of the same material.  
Contributed by Brt. Maj. John Brooke, Asst. Surg. U.S.A.
- A. 5. A Cheyenne Bow, hickory, overlaid and bound at the middle and ends with deer fibres, three and a half feet in length. The bow case and quiver are bound with skin of a white wolf. from Dakota Territory.  
Contributed by Brt. Maj. W.H. Forwood, Asst. Surg. U.S.A.
- A. 6. An Ogalalla Sioux bow of Bois d'arc. Bow case and Quiver of skin of calf, from Fort Laramie Dakota Territory  
Contributed by Brt. Lt. Col. H.S. Schell, Asst. Surgeon, U.S.A.
- A. 7. A Hoopa Indian Bow, made of cedar and covered with the skin of a rattlesnake. (*Crotalus durissus*)  
Contributed by Act. Asst. Surgeon P. Moffatt.

A. 8. A hickory arrow two feet in length, used by the Indians of Minnesota for killing small birds and by the men for practice. It is stained red and is quite blunt being rectangular at the head. From Fort Ridgely.

Contributed by Act. Assist. Surgeon Alfred Miller,

A. 9. A hickory arrow two feet in length, with the head drawn out spike-shaped and stained red. It is used for killing the smaller birds and by the Indian boys for practice. From Fort Ridgely. Contributed by Act. Assist. Surgeon Alfred Miller.

A. 10. A Yankton arrow, (Upper Sioux) also used by the Lower Sioux. In consequence of the constant intercourse of the different tribes of the Lower and Upper Sioux Indians, no specific character is found in the arrows, used by the several tribes, although the Yanktons and Sissetons, (Upper Sioux) prefer theirs in preference with yellow colored feathers. The shaft is about twenty-two inches in length, and one-fourth of an inch in diameter. From about three inches from the extremity three irregular longitudinal grooves run down to the feathers. These grooves are possibly to permit the escape of blood, so that the wounded animal may be tracked. Beyond that they have no known significance.

On L. d. s. Boston is between nine and ten.

inches in length. The arrow-head is of iron and spear-shaped, being in this specimen one inch broad at the base and nearly two inches in length. The edges of the head are grooved and somewhat sharpened. The head is held in a cleft of the shaft by means of tendinous bands that loosen when long moistened by the blood of the stricken prey.

Other arrow-heads used by the Sioux vary from this size to that of a breadth of five eighths of an inch by a length of nearly four inches.  
Contributed by Act. Asst. Surg. Alf. Müller

A. 11. A Yankton or Sisseton (Upper Sioux) arrow. The yellow color of the inner side of the feather is characteristic.

Contributed by Act. Asst. Surg. Alf. Müller

A. 12. A variety of the Upper Sioux arrow.

Contributed by Act. Asst. Surg. Alf. Müller.

A. 13. A Upper Sioux arrow, adopted by the Lower Sioux.

Contributed by Act. Asst. Surg. Alf. Müller.

11. N. 14. A Lower Sioux Arrow.  
Contributed by Act. Asst. Surg. Alf. Müller.
15. N. 15. A Sioux arrow, the particular designation  
of which has been mislaid. It does not however  
differ materially from the others.  
Contributed by Act. Asst. Surgeon Alf. Müller.
16. N. 16. A Lower Sioux Arrow. This specimen  
bears marks of service.  
Contributed by Act. Asst. Surg. Alf. Müller.
17. N. 17. A war arrow, from which the head is wanting,  
used by all the Sioux. The head was glued  
to the shaft in order to remain in the wound.  
Contributed by Act. Asst. Surgeon Alf. Müller.
18. N. 18. Two unused Upper Sioux arrows, from the  
neighborhood of Fort Meadsworth, Dakota Territory.  
The iron heads are undoubtedly of civilized  
manufacture, introduced among the Indians  
by traders.  
Contributed by Brig. Maj. John S. Billings, Asst.  
Surgeon, U.S.A.

- A. 19. A stone arrow head, used by the Apache Indians of Arizona. It is attached to the shaft by cement which permits its disengagement in the wound. It is irregularly triangular, three fourths of an inch in its greatest length and one third in its greatest width, and has two notches as barbs on each of its long sides.  
Contributed by Asst. Surgeon E. Cones, U.S. Army
- A. 20. Two unused Upper Sioux arrows, from the neighborhood of Fort Mads worth, Dakota Territory. The iron heads are undoubtedly of civilized manufacture, introduced among the Indians by traders.  
Contributed by Brt. Maj. Jthw S. Billings, Asst. Surgeon, U.S.A.
- A. 21. Fifteen Hoopa Indian hickory arrows, thirteen of them have heads of various colored quartz curiously barbed, and averaging an inch in length. Two have barbed steel heads, - all are thirty inches in length. The stone headed arrows are nearly all painted with alternate blue and red bands at both extremities of the shaft, and are feathered for six inches with black and white feathers. The two iron headed arrows are painted with black bands and have black feathers. These and

and eight of the stone headed arrows, have irregular longitudinal grooves.

Contributed by Asst. Surgeon P. Moffatt, U.S.A.

A. 22. Four Navajo arrows made of hickory and iron headed, two feet in length. from Ft. Sumner, N.M.

Contributed by Capt. Maj. John Brooke, Asst. Surg. M.C.

A. 23. Indian iron arrow-head.

Contributed by Act. Asst. Surgeon Alf. Müller.

A. 24. The point of a barbed arrow, shot by an Indian in the body of John Fenster, Aug. 18<sup>th</sup> 1882, between the fifth and sixth ribs, left side, near the vertebrae, and extracted two days afterwards. It was embedded one inch beneath the surface of the skin, having penetrated the lung.

Contributed by Act. Asst. Surgeon Alf. Müller.

A. 25. An iron arrow head, which had been embedded one inch in the ilium. It is three inches in its extreme length and half an inch in its widest part, it is neither dis-

torted nor disfigured. Missile was extracted  
and contributed by Asst. Surgeon B. A. Clements,  
U.S. Army.

A. 26. An iron arrow-head, removed from the scapula  
at the base of the spine. The missile, which  
is two inches in length and half an inch  
wide at the base, was greatly bent upon itself  
by the force of its impact.

Private — 5<sup>th</sup> U.S. Infantry: entered just  
above the posterior fold of the axilla; the shaft  
separated with the slightest traction: probing  
to the depth of two and a half inches failed to re-  
veal it; after waiting three months, it was  
discovered, after an extensive T-shaped incision,  
and extracted by Asst. Surgeon B. A.  
Clements. U.S.A. Fort Dauphinay, N.M. 1861.  
Contributed by the operator.

A. 27. An Apache iron arrow-head removed from  
the testicle of a Mexican herder, three months  
after the reception of the wound. The external  
wound is entirely healed over. Operator and  
contributor, Brt. S. May. A. M. Smith Assistant  
Surgeon. No. 5.

A. 28. A typical Sioux war arrow; the head is deeply barbed and only fastened to the shaft with glue or slightly with ligament; and after a few minutes maceration in the fluids of the body becomes loose and remains when an attempt is made to withdraw the arrow by means of the shaft.  
Contributed by Bvt. Lt. Col. W. S. Schell, Asst. Surg.

W.S.S.

A. 29. Four arrows pulled from the bodies of men slain in the massacre at Ft. Phillip Kearney, December 1866. The one with a head is an ordinary hunting, showing that they are also sometimes used in war.  
Contributed by Bvt. Lt. Col. W. S. Schell, Asst. Surg. W.S.S.

A. 30. An Arapahoe arrow, pulled from the body of a man who was scalped about two miles from Fort Laramie, Dakota Territory in June 1867. The arrow is distinguished by the deeper incision for the bowstring and the lesser amount of flare at the finger end of the shaft that occurs in the Sioux arrow and also by the absence of the longitudinal grooves which ornament the latter.

Contributed by Bvt. Lt. Col. W. S. Schell, Asst. Surgeon, U.S.A.

the Genealogist  
Acc. 517, 814*
- A. 31. A Sioux arrow pulled from the body of an ox which was shot in an attempt made by a party of Indians to run off the stock of a wagon train, on the road between Fort Laramie and Reno, May 1867. The head of the arrow, was stuck fast in the hip bone and was broken in pulling it out.  
*Contributed by Capt. G. C. H. S. Schell, Asst. Surg., U.S.A.*
- A. 32. Five Sioux common hunting arrows; the head is securely fastened to the shaft so that the arrows may be pulled out of the body of an animal entire, and used again and again.  
*Contributed by Capt. Lt. Col. W. S. Schell, Asst. Surgeon, U.S.A.*
- A. 33. A Cheyenne arrow from Dakota Territory.  
*Contributed by Asst. Surgeon W. H. Drwood, U.S.A.*
- A. 34. Two Sioux arrows from Dakota Territory.  
*Contributed by Asst. Surgeon W. H. Drwood, U.S.A.*

Acc. 517, 823*
- A. 35. An Arapahoe arrow taken from the body of a citizen killed near Fort Fletcher, Kansas, June 1866.  
*Contributed by Asst. Surgeon W. H. Drwood, U.S.A.*

A. 36. Two Sioux arrows taken from the bodies of citizens killed by the Indians at Downer's Station Kansas, January 1866.

Contributed by Asst. Surgeon W. H. Forward, M.D.

A. 37.  
Captured  
from Federals  
Acc. 51742

Two Kiowa arrows taken from the body of Private Spillman, 3<sup>rd</sup> 7<sup>th</sup> U.S. Cavalry, mortally wounded by Indians, June 12<sup>th</sup> 1867, at Fort Dodge, Kansas. On the morning of June 12<sup>th</sup> a party of Kiowa Indians dashed over the bluffs upon the cavalry herd grazing about a mile from the Post (Fort Dodge) and getting between the herd and the Post succeeded in stampeding it down the river; herder Spillman was attacked by two Indians, who wounded him in three places; one slight in right shoulder, one in right side, the missile glancing from a rib and making a wound in oblique muscle take a stitch about three inches in length; and one through the right lumbar region penetrating into the abdominal cavity to a depth of about eight inches or more. The missile in side was removed by cutting the arrow in two and withdrawing the parts. In the right lumbar region it was removed with great difficulty. The wound being enlarged on either side of the shaft, and two fingers passed down immediately in contact with either angle of the iron head. serving both as a guide and protection. - Tractum being made the

arrow was withdrawn. The latter wound  
was mortal, the man dying next day  
at about 3 P.M.

Contributed by Asst. Surgeon C.S. De Graw, 2d Maj.  
U.S. Army.

A. 38. Three Kaw (Qua Paw) Indian hunting arrows  
Contributed by Asst. Surgeon A. B. Campbell, U.S.A.

A. 39. Seven Kiowa arrows.  
Contributed by 2d Maj. C.S. De Graw, Asst. Surgeon,  
U.S.A.

B. 1. A Sioux war-spear principally used upon  
the bodies of the wounded to discover if they  
are still alive. The iron head is six inches  
in length, very two broad at the base and is  
bound by iron wire to a handle of light wood  
four feet in length. This handle is ornamented  
at intervals with plumage of birds, nearly  
all of which in this specimen is worn off. One  
of these spears belongs to each band and is  
held by the medicine-man, being inherited  
from father to son. It is only removed from  
the cloth in which it is wrapped during  
war time. It is said that no new ones  
are fabricated.

Contributed by Asst. Surgeon M.L. Müller.

B. 2. An ancient battle-axe, found in South Arizona, supposed to be a relic of the Aztecs.  
Contributed by John C. McFerran Brig. General and Deputy Quar. Genl.

C. 1. The scalp of a Navajo, being the trophy of a Ute Indian. This specimen is a very fine one. The hair is two feet in length and very thick. The scalp is ornamented with beads, for six inches square.  
Contributed by Asst. Surgeon A. B. Campbell, U.S.A.

C. 2. Scalp trimmed for an ear ornament purchased from a Colorado Indian warrior.  
Contributed by Dr. A. B. Campbell, late Surg. H.S.Y.

C. 3. Necklace of twenty-one finger nails, being trophies taken in battle from the Navajo Indians and ornamented with bead work and worn by the Utes.  
Contributed by Surgeon B. A. Clements, U.S. Army

6. 4. An Apache necklace of twenty-nine finger nails, from trophies taken in battle, ornamented with bead work.

Contributed by Surgeon B. A. Clements, U.S. Army.

6. 5. A Navajo necklace of the lower jaw and teeth, ornamented with bead work, taken from enemies slain in battle.

Contributed by Surgeon B. A. Clements, U.S.A.

D. 1. Eighteen grizzly bears' claws, from the Navajo Indians.

Contributor unknown.

D. 2. A pair of Sims moccasons, ornamented with red, white and green beads.

Contributor unknown.

D. 3. Necklace of a Navajo Indian killed by a Pueblo.

Contributed by Dr. G. W. Bradford, late Asst. Surgeon.

- D. 4. A pair of moccasons from Cheyenne Indian  
soles of Buffalo hide.  
Contributed by F. G. H. Bradford, late Act. Asst.  
Surgeon.
- D. 5. A Tobacco Pouch from an Apache Indian,  
ornamented with beads, for cigarette smoking.  
Contributed by F. G. H. Bradford, late Act. Asst.  
Surgeon.
- F. I. A Navajo Oyo, an earthern-ware vessel  
F. I. for cooking.  
Contributed by F. G. H. Bradford, late Act.  
Asst. Surgeon.
- D. 7. An Indian Tobacco Pouch, ornamented with  
with beads, from Colorado Territory.  
Contributed by Asst. Surgeon A. B. Camp well, W.S.A.
- D. 8. An Indian neck ornament, brought by a  
trader from the Upper Yellowstone. The turtle is  
*the Chelydra Serpentina*.  
Contributed by Asst. Surgeon A. B. Camp well, W.S.A.

- D. 9. A Tobacco Pouch made of the skin of a brown mink (*Putorius vison*) from a Sac Indian. The uninjured crania has been removed and placed in the craniological cabinet.  
Contributed Asst. Surgeon A. B. Campbell, U.S.A.
- D. 10. A pair of small moccasons from a Navajo Indian at Fort Sumner, N.M.  
Contributed by Asst. Surgeon Jno. Brooke, U.S.A.
- D. 11. A pair of moccasons from a Navajo Indian at Fort Sumner N. M.  
Contributed by Asst. Surgeon John Brooke, U.S.A.
- D. 12. A Kawa whip from chief Kicking Bird.  
Contributed by Asst. Surgeon W. H. Farwood, U.S.A.
- D. 13. A Sioux Indian Pipe from Dakota Territory.  
Contributed by Asst. Surgeon W. H. Farwood, U.S.A.

- D. 14. An Indian Rattle, ornamented with feathers used by the medicine-man of the Kawa tribe over the sick to cure or drive away disease. Contributed by Asst. Surgeon H. H. Fordwood, U.S.A.
- D. 15. A Bridle Bit from the Skajos Reservation at Fort Sumner, N.M.  
Contributed by Asst. Surgeon John Brooke, U.S.A.
- D. 16. A pair of Dakota Moccasons.  
Contributed by Brt. Brig. Genl. C. H. Crane  
Assistant Surgeon General, U.S. Army
- D. 17. Pipe of "Little Bear" chief of the Northern Apaches.  
Presented by Surgeon Dr. L. C. Peters, to Brt. Brig. General C. H. Crane U.S.A. and by him to the Museum.
- D. 18. Pair of Sioux Moccasons, purchased from an Indian of Red River, in 1850.  
Contributed by Robt. E. Williams.

A. 40. Bow and nine arrows obtained from the Indians at the mouth of the Columbia River, Oregon. Obtained by the Wilkes' Exploring Expedition. Procured by exchange from the Smithsonian Institution.

A. 41. Three Apache Indian Arrows. Obtained near Tucson, Arizona Territory, obtained by exchange from the Smithsonian Institution.

E. 1. A New Zealand Bow, and fifteen arrows with poisoned tips. The bow is made of cocao wood and is six feet and four inches in length. The arrows average more than four and a half feet in length. Procured from the Captain of a Whaling Ship.  
Presented by Capt. May H. G. Gardner, Assistant Surgeon, U.S.A.

E. 2. An injured Enfield rifle from the battle fields of Gettysburg. The stock has been carried away by a missile opposite the rear sight, and the under surface of the barrel is bruised near by. The stock is also fractured higher up. The rammer partly withdrawn is held bent.

Contributed by Brig General George D. Ramsay,  
Chief of Ordnance, U.S. Army.

E. 3. An injured Harper's Ferry musket from the battle field of Gettysburg. The barrel is pierced in two places near the upper bands, as if by fragments of shell, and the muzzle is a little torn. The stock is somewhat splintered in its upper part. The piece bears the private mark of T.M.J. on the breech.

Contributed by Brigadier General Geo. D. Ramsay,  
Chief of Ordnance, U.S. Army.

E. 4. An injured Springfield rifled-musket from the battle field of Gettysburg. A leaden ball has carried away the upper extremity of the stock and is embedded in the barrel, which is compressed, slightly ruptured, and moderately deflected. The piece bears the private mark of W. on the stock near the lock.

Contributed by Brigadier General Geo. D.  
Ramsay, Chief of Ordnance.

E. 5. A boot for the right foot, showing the wounds of entrance and exit of a bullet passing nearly transversely through the middle of the foot.

Captain D. C., D. 122<sup>a</sup> New York: near  
Fort Stevens, Washington, D.C. July 12 1864.)

E. 6. A rude crutch, made from a forked branch  
by a wounded soldier on the battle field of  
the Wilderness and brought by him to the  
Douglas U. S. A. General Hospital, Washington.  
Contributed by Asst. Surgeon Wm. Thomson.

E. 7. A crudely fashioned strap, two inches wide  
made of Army cloth and fastened with  
two buckles, which was successfully used  
by a malingerer to induce atrophy of the  
right leg.

Private Issa A. Davidson, E. 13<sup>th</sup> Connecticut  
at Knight U. S. A. General Hospital, New  
Haven, Connecticut.

E. 8. A fragment of wood from the wreck of  
the rebel iron-clad steamer Merrimac.

E. 9. A part of the upper extremity of the right  
femur incrusted with a fossilizing stone-like  
material to the thickness of an eighth of an  
inch. The head and part of the neck are  
wanting, at the place

- E. 10. One foot of submarine telegraph cable. It is made of copper wire, coated with gutta-percha cased in varred rope and spirally wrapped with twelve strands of iron wire in one layer. Believed to have been laid by the Rebels between forts Gregg and Sumter and Charleston, and to have been contrived by Acting Assistant Surgeon H. K. Neff.
- E. 11 A Tartar tobacco pouch used by the Tartar women in the Crimea.  
Contrived by Asst. Surgeon A. B. Campbell.  
U.S. Army.
- E. 12. A copper globe, 18 inches in diameter, which formerly surmounted the dome of the R. R. Depot at Fredericksburg, Va. On the 13<sup>th</sup> of December this depot was used as a signal station by the Union soldiers, and this globe was perforated by many balls from the Confederate sharpshooters at the foot of Marye's Heights.  
Presented by John R. Evans, & Co. Washington D.C.

B. 3. A Indian Battle axe, weighing three and a half pounds. dug up in the vicinity of Annapolis, Anne Arundel Co. Md.

Presented by Brevet Colonel C. Sutherland,  
Asst. Surgeon U.S.A.

D. 41. Two Indian Stone arrow heads, one of white quartz and the other of blue slate.

Presented by Bvt. Colonel C. Sutherland,  
Asst. Surgeon. U.S. Army.

D. 19 Necklace of Grizzly Bear's claws (Makto shangh bee) wanapa) Equivalent in value to an Indian horse, and said to be worn only by the man who killed the animal.

Obtained from (Mah-glu-pah) The Small Bird by and  
Presented by Asst. Surg. A. G. Campbell. USA

B. 4. Stone War mace (E hove chatah) The badge of authority of (chang changimah) The dressing of the stone occupied five months, and the brass wire and beads cost six dollars at the Gauntlet agency.

Presented by Asst. Surg. A. G. Campbell. USA.

E. 2. Mortar of Buffalo Hide (Wah-fah-keu) and Stone Hammer or Pestle (Wee-chee-tah) used to bore dried berries fruits and pumpkins. The hammer occupied from 3 to 5 months to shape, by pounding with another stone.

Presented by Asst. Surg. A. G. Campbell. USA.

- 4 F. 3. Stone Hammer (we-hare-chee-tah) used for breaking Buffalo bones to extract the marrow.  
Presented by Asst. Eng. A. P. Campbell. M.D.
- 5 A. 43. Yankton Bow (Tah-fai-stah-zupah) and Ten Arrows (Mah-heught-pah) The bow is overlaid with sinews on the back and bound around the ends. It is painted to prevent the absorption of moisture. A bow thus made is five times the value of the ordinary bows.  
Presented by Asst. Eng. A. P. Campbell. M.D.
- 6 D. 20 Pipe (Chimpa) in daily use among the Indians.  
Presented by Asst. Eng. A. P. Campbell. M.D.
- 7 B. 5. War Club with Knives (minna-chang-ofatapee) Used by a Yankton in the Minnesota massacre, and killed a Santee with it. Sold by its owner to escape starvation.  
Presented by Asst. Eng. A. P. Campbell. M.D.
- 8 F. 21 Medicine Rattle (Kah-hah-lah hoo-hoo) and Medicine Drum (Chang-cha-hah) Used in incantations over the sick. This was last used over a fatal case of consumption by the man squaw. Had the patient recd., the articles could not have been procured at any price.  
Presented by Asst. Eng. A. P. Campbell. M.D.

F. 4. Two Panniers (Moge-pah-zuhah) made of Buffalo Hide and used for packing food on the march. One for each side of the horse.

Presented by Ass't. Surg. A. B. Campbell, M.D.

F. 22. Drum (Chang-chee-gee) Used in open air dances outside the "tippee". Sometimes used in the Scalp dance.

Presented by Ass't. Surg. A. B. Campbell, M.D.

D. 24. Buckskin shirt ornaments (Ogalee-epa-tah-pu) porcupine quills sewed on with sinew strings.

Presented by Ass't. Surg. A. B. Campbell, M.D.

B. 6. War Club (Ea-chang-pee) belonging to (Cha-Chiamash)  
"The man with his legs wide apart". Chief of the Gantlon  
Half breeds. Occupied a man two months in carving.  
Presented by Ass't. Surg. A. B. Campbell, M.D.

D. 25. Three Indian Tobacco Pouches.

Presented by Mr. J. B. McGuire.

B. 7. Indian Battle Axe.

Presented by Mr. J. B. McGuire

- 5 F. 5. Fragment of an Indian utensil, picked up in Sun River Valley, Montana Territory.  
Presented by Mr. F. P. McGuire.
- 6 A. 59 Five Comanche Indian Arrows, shot at a wagon train in New Mexico.  
*Copied from  
Fowler  
Acc. 57, 817*  
Presented by Mr. F. P. McGuire.
- 7 A. 44. An Apache arrow with quartz head, shot at a wagon train in New Mexico.  
Presented by Mr. F. P. McGuire.
- 8 A. 45 Six quartz and slate arrow heads, from Miller, Howard County, Maryland.  
Presented by Mr. F. P. McGuire.
- 9 D. 26 A carved soap stone pipe from the West Coast of America.  
Presented by Mr. F. P. McGuire.
- 100 F. 6. Navajo Earthen Dish.  
Presented by Capt. Dr. Col. J. Cooper M.D.  
Sergeant M.S. Army.

- D.28. Navajo Indian Shield for the protection of the back  
Presented by Asst. Surg. J. F. Weeds, M.D.
- 2 F. 7. Part of a Stone implement, supposed to be used for clearing and dressing skins. Found in the bed of the Rio Grande, near Fort Craig, New Mexico.  
Presented by Surgeon J. Cooper McKee, M.D.
- 03 A.46 Navajo Bow, <sup>curved</sup>, Quiver, and 13 arrows with leather protectors for the wrist. The reed arrows are of Apache manufacture.  
Presented by Surgeon J. Cooper McKee, M.D.
- 04 D.30 Pouches, Drinking Cups and Paint of Navajo manufacture  
Presented by Surg. J. C. Mc Kee, U.S. Army.
- 05 F. 8 Mandan Pipe used to the exclusion of those of white manufacture.  
Presented by Surg. G. G. Gray & Ass't Surg W. Matthews
- 06 F. 9 Wooden Dish of Mandan manufacture. Anterior  
Presented by Surg. G. G. Gray & Ass't Surg W. Matthews.

- F. 10 Earthen Pot of Gros Ventre manufacture.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews USA
- F. 11 Spoon, made from the horn of a mountain sheep.  
Gros Ventre manufacture.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews USA.
- F. 12 Mandan instrument for dressing and preparing  
skins.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews
- B. 8 Trickgame Stone Hatchet.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews
- B. 9 Gros Ventre Flint Knife, now almost obsolete.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews
- F. 13 Stone Mallet for making pemmican. Yankton.  
Sioux manufacture.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews USA
- F. 14 Gros Ventre Hoe, made from the shoulder blade  
of an Elk.  
Presented by Eng. C. C. Gray & Ass't. Eng. W. Matthews USA

- D. 21 Wooden Saddle from the Yanktonais Sioux.  
Presented by Dr. G. C. Gray & Ass't Dr. W. Matthius USA
- 5 D. 22 Pad Saddle ornamented with bead work, from the  
Yanktonais Sioux.  
Presented by Dr. G. C. Gray & Ass't Dr. W. Matthius USA
- 6 E. 17 Gros Ventre Parfleche or meat case  
Presented by Dr. G. C. Gray & Ass't Dr. W. Matthius USA
- 17 D. 6 Horn handled Riding Whips. Mandan manufacture.  
Presented by Dr. G. C. Gray & Ass't Dr. W. Matthius USA
- 18 A. 47 Gros Ventre Bow, Arrows, Quiver, & Game stick.  
One of the arrows is fixed for use in veterinary  
surgery, to scarify horses.  
Presented by Dr. G. C. Gray & Ass't Dr. W. Matthius USA
- 19 A. 48 Bow made from the horn of an Elk.  
Arikaree Manufacture.  
Presented by Dr. G. C. Gray & Ass't Dr. W. Matthius USA

- B.10 Knife Sheath of Sioux manufacture  
Presented by Eng. G. B. Gray & Ass't. Eng. W. Matthews USA
- C. 6. Scalp of a Blackfoot Indian obtained by an  
Arikaree at a fight near Fort Benton  
Montana Territory & worn as a trophy.  
Presented by Eng. G. B. Gray & Ass't. Eng. W. Matthews USA
- D. 23. Wheel used in Boy's games. Gros Ventre man-  
ufacture. Presented by Eng. G. B. Gray & Ass't. Eng. W. Matthews USA
- D. 27 Medicine Rattle used by Gros Ventres  
Presented by Eng. G. B. Gray & Ass't. Eng. W. Matthews USA

Presented by Ad. Asst. Eng. J. Frazer Broughton.

C.8 Yankton Sioux War Headdress, indicates  
the number of enemies slain in battle.

Presented by Ad. Asst. Eng. J. F. Broughton near

A.67. Shoshone Bow and four Arrows. The bow is made  
of the bow of an ox yoke obtained along the emigrant routes. They  
are soaked in hot water and then bent into their present shape, reversing  
the curve as found. The compound curve in the middle is thus  
easily obtained. The outer part of the bow is covered with strips  
of tendon which increases its elasticity. Two of the  
arrows are round pointed and are used in shooting small  
game. The other two arrows have triangular iron heads.

Presented by Adst. Eng. Wm. S. Waters McRamp,

A. 68 Ute Bow and two Arrows. The bow is made from an Ox Yoke - (See 209. A. 67).

Collected by Asst. Surg. W. E. Waters M.D.

A. 69 Pianack Bow and two Arrows. The bow is made from an Ox Yoke (See 209 a. 67)

Collected by Asst Surg. Wm. E. Waters M.D.

A. 70. A poisoned Navajo Arrow.

Collected by Asst. Surg. W. E. Waters M.D.

B. 20 Tomahawk made in the East and sold to the Indians by Traders. The specimen is made to be used as a fiske, but it is of doubtful utility in that respect and seems not to have been used as such by the owner.

Collected by Asst. Surg. W. E. Waters M.D.

A. 71

Bow Case and Quiver.

Presented by Asst Surg. Wm. E. Waters U.S. Army.

B. 21

An Indian War club consisting of an ovoid  
quartz pebble fastened to a stick two and three  
fourths feet in length, by hide. The handle is or-  
namented with beads.

Presented by Asst Surg. R. J. Kitz.
